

# Environmental Science

## PATHWAY DESCRIPTION

The Environmental and Natural Resources Science pathway provides students with the scientific principles and methods required to understand the interrelationships of the natural world, identify and analyze environmental problems that are natural and human-made, evaluate risks associated with these problems, and examine alternative solutions. The pathway prepares students for a variety of careers including environmental engineer, environmental science and protection technician, geological and petroleum technician, natural sciences manager, wildlife biologist, and zoologist.

### Courses

Natural Resources & Ecology

Environmental Science Issues
