

# Nurse Assisting

## PATHWAY DESCRIPTION

The Nurse Assisting program of study is a three (3) course CTE instructional program that engages students in open-ended problem solving where they study topics such as medical terminology and human anatomy and physiology. Through exploration of the National Health Science Standards, students will acquire important skills necessary for healthcare professionals such as medical mathematics, communication, safety practices, legal responsibilities, and teamwork. In addition, students will develop technical skills such as providing personal care of the resident while taking care of their environmental needs and psychosocial needs.
